

MY ANNUAL CONSUMER DEBT TRACKER

* List your smallest debt first & your largest debt last. Ex. \$500 credit card debts come before \$100,000 home loans. (Remember to print off more sheets if you have more than 2 creditors.)

* Your first priority is the smallest debt & your last priority is the largest debt owed. (You'll experience a better feeling of accomplishment by using this method rather than tackling the debt with the highest interest. Plus, it's more incentive to continue tackling ALL your debt.)

* Put any extra money or extra payments towards the debt with the highest interest rate first.
